

A decorative graphic on the left side of the slide consists of two overlapping parallelograms. The front one is blue and the back one is a light green. They are positioned diagonally, with the blue one partially covering the green one.

Symmetry Patterns in the Ming(1368–1644) and Qing(1644–1911) Dynasties of China

Gabriel Eze and Ben Wafford

Blue and White Porcelain Jar with Dragon and Floral Motifs

Jar showcases the blue-and-white porcelain style of the Ming Dynasty between 14th-17th century.

Floral bands on the top and leaf patterns on the bottom are examples of frieze patterns.

The cobalt blue pigment, imported from Persia, was a significant innovation in Chinese ceramic industry.

They were valuable goods traded along the silk road trading routes through china, the middle east , and europe.

Symmetry: I, III

Multicolor Porcelain Jar with Dragon and Cloud Motifs

Recognizable by its elaborate glazed decorations, this artifact belonged to the Qing dynasty.

Floral bands and repetition at the top and bottom are examples of frieze patterns.

The dragon and cloud motifs represent the emperor's divine authority

Highly decorated jars such as this signalled wealth and status in the imperial court.

Symmetry: I, II, III

Red Silk Robe with Circular Floral Motifs

This imperial robe is an attire from the Qing dynasty court.

The hem and most of the anterior designs are examples of frieze patterns.

The bright purple hem bands derives from a synthetic dye known as “Perkin’s purple”, first imported from England to China in 1871.

The mountain and waves motifs on the midriff represents the foundations of the world according to Chinese cosmology.

Pipa

This is instrument from the Ming dynasty and is played upright plucking the strings with the right hand and playing notes with the left hand on the strings.

The back is made of ivory and the hexagonal pattern is an example of a wallpaper symmetry.

Ivory plaques feature Taoist, Confucian, and Buddhist figures and symbols of prosperity and happiness.

Windows on Hall of Supreme Harmony (Tàihédiàn)

The Hall of Supreme Harmony located in Beijing is one of the largest wooden structures in China.

Used during both Ming and Qing dynasties.

Intersections form a six-petal flower shape.

Windows are an example of wallpaper symmetry.
